

FAMILY RESILIENCY & CAREGIVERS

Wounded Warrior Project® (WWP) understands that veteran families and caregivers have served and sacrificed alongside their loved ones, shouldering many of the same stressors while providing critical stability, support, and care. WWP is proud to support partner organizations that augment WWP’s own programs and services for post-9/11 wounded, ill, and injured service members and veterans. Together, we’re providing a holistic model of care to help military- and veteran-connected children, families, and caregivers thrive.

Alongside our co-chairs at the Elizabeth Dole Foundation, WWP is proud to lead the Hidden Helpers Coalition (HHC) – a collective of more than 80 nonprofits, corporations, and government entities dedicated to supporting children and youth caregivers. WWP continues to invest in organizations that drive innovative, tailored solutions that connect and empower the youngest caregivers of our nation’s wounded warriors.
